

DIY Spray Starch

1

Gather your ingredients:

- 1 oz potato vodka
- 8 oz distilled water
- 1 drop essential oil (optional)
- 1 spray bottle (at least 10 oz)

2

Mix:

First measure the vodka and pour into the spray bottle. Add the essential oil (if you wish to have fragrance) and swirl to mix.

3

Final Mix:

Now measure and add the water to the spray bottle. Again, swirl and tip gently to mix.

NOTES:

- It is critical to use **potato vodka** as it contains a high level of starch.
- This recipe may be easily multiplied for larger batches.
- If you prefer a stiffer starch, the ratio of vodka may be increased as high as 1 part vodka to 4 parts water.
